## Symptoms:

- Small, round or oval spot with uniform color (tan to brown).
- Can be flat or slightly raised with smooth borders.
- Usually stable for many years and asymptomatic.
- May darken with sun exposure or hormonal changes.
- Many individuals have multiple benign nevi.

## Suggested Treatment:

- Routine monitoring for changes (ABCDE criteria).
- Seek dermatology evaluation if rapid growth, irregular border, or color change occurs.
- Removal (excision/shave) if suspicious or for cosmetic reasons.
- Use sunscreen and avoid tanning beds.
